FINANCIAL AND COMMERCIAL.

SUNDAY, Sept 30, 1866. ant week witnessed a further revival of speci lation in railway shares, attended by a general adance of prices and a degree of excitement unparalleled ince the spring of 1864. Although the business in each of the leading stocks was large, the chief interest of the market was centred in Eric and New York Central, and, towards the close, in Michigan South-ern and Rock Island also. The last mentioned, after selling up to 108% on Saturday, ex-the semi-annual dividend of five per cent, relapsed to 108—the equivalent of 113, dividend on. Michigan Southern sold up to 88%, with a spirited demand. The ment in New York Central is attributed to and more immediately to that for the Presi tency, which is shortly to take place at Albany, here the directors of the company met on riday. The position is contested by at least roe candidates. The stock closed at 114 a 34, a price generally considered far above its value, notwith-standing the company's rumored surplus. The Eric movement is based upon somewhat similar grounds, but more is hoped for from a change of management in this shan in the other case, and, as the great highway con-acting the East with the West, its future is a highly omising one. Moreover, owing to the partial failure the crops in Europe, it is expected that there will be large foreign demand for our breadstuffs, and that this point westward during the next year. Her some extent, the strong upward movement of Rock Island, Michigan Southern and the other leading Western stocks. Some of the miscellaneous shares fluctuated sonsiderably during the week. Cumberland advanced to 6)4, and Mariposa preferred declined to 29%. Western

Union Telegraph, too, fell to 54%. Government securities were neglected but firm up to Saturday, when a moderately brisk demand for fivetwenties set in, the result partly of the Treasury seder to suspend conversions of seven-thirty notes nties of 1865. A new five-twenty bond, dated July instead of May, has been prepared, and the Treasury is willing to convert August seven-thirties into these, but the second and third series of the notes are ot similarly available for conversion. The reason why oreference is given to the first series is that they mature within a year from the present time, and is the object of the department to reduce the amount next maturity by conversions into bonds as much as possible. The second and third series, on the other hand, do not mature until June and July, 1868, and there is consequently less necessity for the with regard to the first series; but of the policy of issuing the new bonds for the estensible purpose named we shall have occasion to remark after further inquiry. The when is payable in January and July, on the first of each month. The new bonds bear the motto 'In God we trust," and the portrait of President Johnson.
